

**6th and 7th  
October 2025**

# Aetiological Investigations for Hearing Loss in Children

**Aetiological Investigation of the babies identified through the Newborn Hearing Screening Program and diagnosed to have a hearing loss (from mild to profound), also covering investigation of older children, unilateral and progressive hearing loss and Auditory Neuropathy Spectrum Disorder.**

The course will give delegates a good opportunity to meet leaders in the field of aetiological investigations for hearing loss in children and running established services, and also network with colleagues new to the field.

## **Who should attend?**

Any professional providing an Aetiological Investigation service for children with permanent hearing loss. Preference will be given to those who have not followed the course within the last 3 years.

## **Topics covered:**

- Current National guidelines for Aetiological Investigation of permanent childhood hearing impairment (from mild to profound)
- Roles of CMV, Imaging, Ophthalmology, Vestibular Assessment and Genetics of hearing loss
- Investigation of unilateral and progressive hearing loss
- Auditory Neuropathy Spectrum Disorder

## **Course Director:**

**Dr Shankar Rangan**, Consultant Audiovestibular Physician (Paediatrics), Wirral University Teaching Hospitals NHS Trust, Merseyside
