

WHY INVESTING IN MATERNAL, NEWBORN AND CHILD HEALTH (MNCH) IS CRITICAL FOR SUSTAINABLE RECOVERY AFTER COVID-19

Insights drawn from biomedical, economic and social science fields show that investing in MNCH provides a route to transforming population health, building societal resilience, and strengthening economies.

The aim of the Forum is to assemble the case for investing in MNCH as essential for recovery after COVID-19, and for securing sustainable improvement in population health, prosperity and resilience, amplified across generations.

Join us for a series of free online multidisciplinary meetings
