

# HAVE YOU FILLED IN YOUR **PATIENT DATA** FOR TODAY?

The data you enter are a medical record and contribute to the care of patients.

Health data can also be used for other 'secondary uses', which help to improve the quality and safety of patient care. These include benchmarking, quality improvement, audit, surveillance and research.

- Complete as much information as possible.
- Ask for help or check with your shift leader if you are unsure.
- Check category of care after entering the daily data.

**Accurate data, entered once can be used for multiple outputs.**

**BAPM**
