

# Efficient use of POCUS in NICU

24<sup>th</sup> and 25<sup>th</sup> Apr 2026

Education Centre, St Peter's  
Hospital, Chertsey, Surrey KT16 0PZ

## Lungs, Lines and Heart

A 2-day course for Neonatal and Paediatric Consultants and Trainees, Specialty Doctors and ANNP's interested in learning and improving their lung ultrasound and other POCUS skills.

As a Hybrid event there is the opportunity to attend Day 1 via TEAMS or both days face to face. There will be a combination of theory (Day 1) and practical skills sessions (Day 2) focussing on lungs, lines and heart.

No prior experience in Ultrasound is required.

### Topics

#### Day 1:

- Basics and physiology of USS
- Normal and abnormal lung ultrasound findings
- POCUS for vascular catheters
- Looking at the Heart – the basics
- When vascular catheters go wrong
- PDA haemodynamic assessment
- Ultrasound of a collapsing baby and ET tube position adjustment
- Case Presentation

#### Day 2:

- Practical Hands on sessions
- Interactive video session
- MCQ evaluation

Online access to the lectures will be given prior to the course
