Sentiment Survey Q4 2020

Preview Results for Known Participants

PRIVATE & CONFIDENTIAL NOT TO BE DISTRIBUTED

November 2020

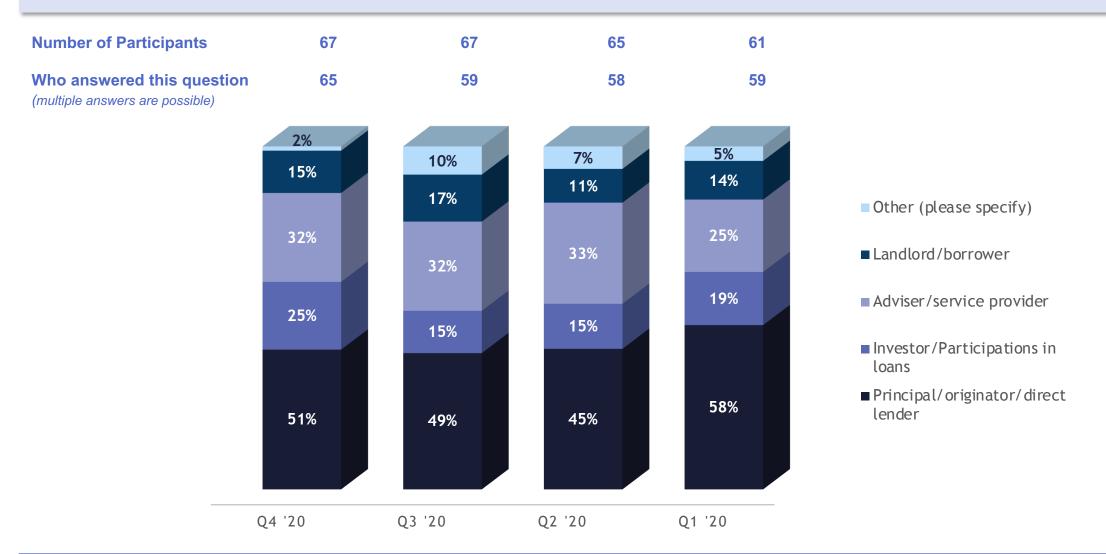

Key messages

- The Q4 survey had 67 participants and was live between 27 September and 20 October. Participation rate this quarter was about one third of 200+ individuals invited to respond. As with previous quarters, there was good breadth of types of participants.
- Following the covid-induced shock in Q2 and Q3, views on the UK debt market are more positive, with 50% of respondents assessing the overall UK debt market conditions to be at least moderately better. More positive sentiment about the UK market seems to be particularly underpinned by positive views on volume of new business, availability of debt and to a lesser extent on better pricing/margins.
- The trend towards a more positive sentiment in Q4 seen for UK market conditions is also notable for European market conditions. Excluding those respondents that did not have a view, 48% of respondents viewed market conditions for the European debt market as at least moderately better. As with the UK market, positive views on volume of new business, availability of debt and better pricing/margins are the most significant factors leading to the the positive views on the European market overall.
- The trend towards stricter financial covenants on new loans continues, with LTV levels decreasing and ICRs becoming slightly more demanding across UK and Europe.
- Whilst perceptions on the political environment have worsened as European governments tried to navigate through the pandemic's second wave, negative sentiment about the economic impact and real estate fundamentals may have peaked in Q2/Q3.
- Although negative sentiment about retail and hospitality has turned slightly (mainly with the proportion of those feeling significantly pessimistic reducing), the pattern that has emerged since Q2 remains largely the same industrial/logistics being the major winner, whilst sentiment for challenged sectors of retail, hospitality, office and student accommodation is more than 50% negative.
- This quarter a new question was introduced asking about views on real estate debt returns expectations compared with other asset classes. As this is a new question, at this stage there is no trend. However, it is surprising that 1 in 4 respondents perceive risk adjusted returns for real estate debt to be worse than extremely low yielding coupons like sovereign debt and BBB corporate bonds (assets that are not without risk in the current crisis). At the other end of the risk spectrum, more than 1 in 3 see direct real estate as more attractive.
- In terms of new busines origination, debt funds are expected to be better positioned to capitalise on origination potential, whereas banks both commercial and investment banks are seen as less well placed.
- With respect to attractive opportunities by risk level, on average respondents see most attractive opportunities in Q4 at lower risk levels than in Q3. As with previous quarters, opportunities appear to be more attractive at slightly lower risk levels by location than by type of asset or type of lending.
- Contrary to the mildly positive views, qualitative comments about the market and the Covid impact suggest an overweight towards negative to neutral sentiment. A few positive views are expressed, but they are heavily caveated.

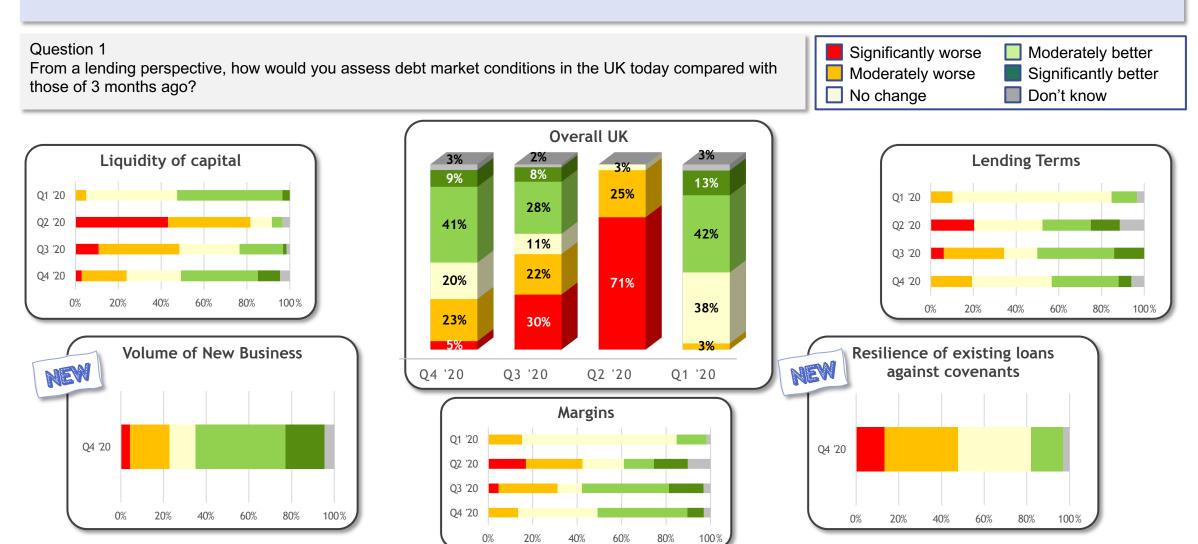

Participation rate this quarter was about one third of 200+ individuals invited to respond. As with previous quarters, there was good breadth of types of participants.

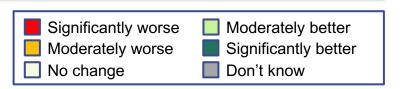

Following the covid-induced shock in Q2 and Q3, views on the UK debt market are more positive, with 50% of respondents assessing the overall UK debt market conditions to be at least moderately better.

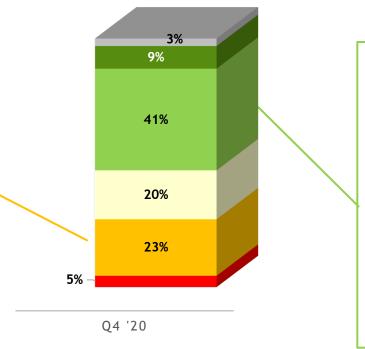

More positive sentiment about the UK market seems to be particularly underpinned by positive views on volume of new business, availability of debt and to a lesser extent on better pricing/margins.

Question 1 – cont'd

Views on UK Market Conditions

- 40% are direct lenders and 27% are borrowers
- Factors that appear to influence negative perception more are views on:
 - resilience of existing loans vs. financial covenants and real estate fundamentals (87% view as worse)
 - Economic and political environment (80% view as worse)
 - availability of debt/liquidity of capital (73% view as worse)
- There appears to be less correlation with views on:
 - Pricing/margins (27% view as worse)

- 52% are direct lenders and 37% are advisers
- Factors that appear to influence positive perception more are views on:
 - volume of new business (92% view as better)
 - availability of debt/liquidity of capital (89% view as better)
 - pricing/margins (67% view as better)*
- On the other hand, there appears to be little correlation with views:
 - on resilience of existing loans vs financial covenants (33% view as better)
 - economic environment (19% view as better)
 - political environment (4% view as better)
 - real estate fundamentals (4% view as better).

^{*} Worse = moderately and significantly worse combined / Better = moderately and significantly better combined

The trend towards a more positive sentiment in Q4 seen for UK market conditions is also notable for European market conditions. Excluding those respondents that did not have a view, 48% of respondents viewed market conditions for the European debt market as at least moderately better.

Question 2 Significantly worse Moderately better From a lending perspective, how would you assess debt market conditions in Europe ex UK today compared Moderately worse Significantly better with those of 3 months ago? As with the UK market, positive views on volume of new business, availability of debt and better pricing/margins are the most significant factors leading to the the positive views on the European market overall.

Question 1 – cont'd

Views on Europe ex UK Market Conditions

- 38% are direct lenders and 38% are advisers
- Factors that appear to influence negative perception more are views on:
 - Political environment (85% view as worse)
 - Real estate fundamentals (85% view as worse)
 - Economic environment (69% view as worse)
- There appears to be less correlation with views on:
 - Pricing/margins (27% view as worse)
 - Volume of new business (46% view as worse)

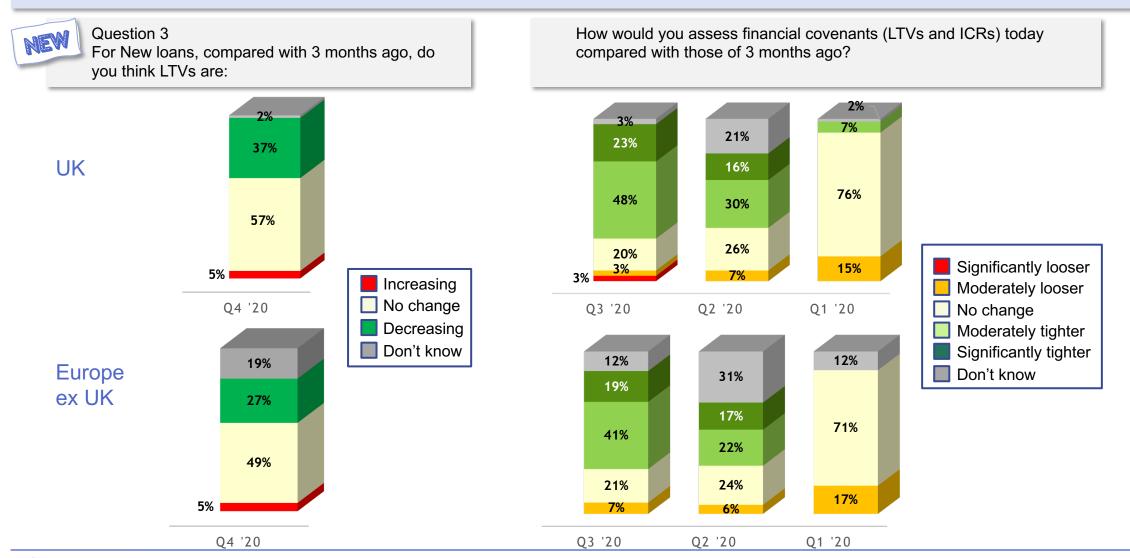

- 52% are direct lenders and 33% are advisers
- Factors that appear to influence positive perception more are views on:
 - availability of debt/liquidity of capital (91% view as better)
 - volume of new business (81% view as better)
 - pricing/margins (57% view as better)*
- On the other hand, there appears to be less correlation with views:
 - Lending terms (33% view as better)
 - on resilience of existing loans vs financial covenants (29% view as better)
 - economic environment (24% view as better)
 - political environment (5% view as better)
 - real estate fundamentals (no one viewed as better).

^{*} Worse = moderately and significantly worse combined / Better = moderately and significantly better combined

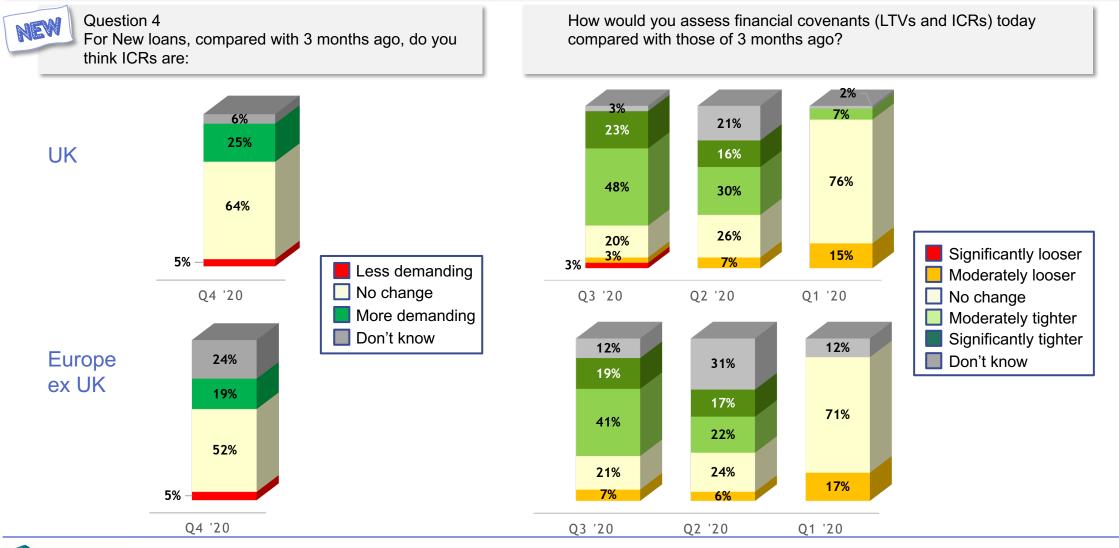

The trend towards stricter financial covenants on new loans continues, with LTV levels decreasing across UK and Europe...

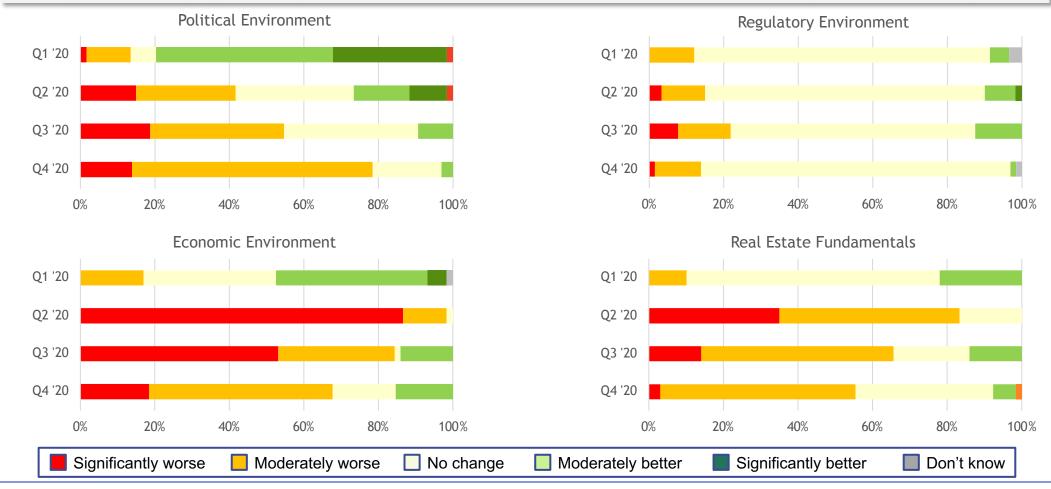

...and ICRs becoming slightly more demanding.

Whilst perceptions on the political environment have worsened as European governments tried to navigate through the pandemic's second wave, negative sentiment about the economic impact and real estate fundamentals may have peaked in Q2/Q3.

Question 5 From a generic lender's perspective, do you think that the situation is worse or better in each of these areas, compared with 3 months ago?

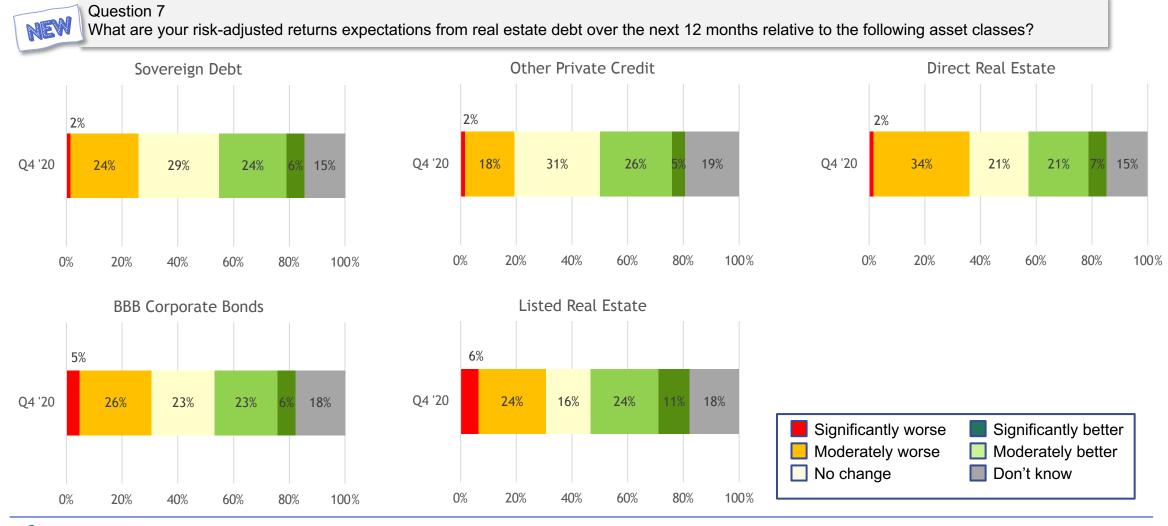

Although negative sentiment about retail and hospitality has turned slightly (mainly with the proportion of those feeling significantly pessimistic reducing), the pattern that has emerged since Q2 remains largely the same – industrial/logistics being the major winner, whilst sentiment for challenged sectors of retail, hospitality, office and student accommodation is more than 50% negative.

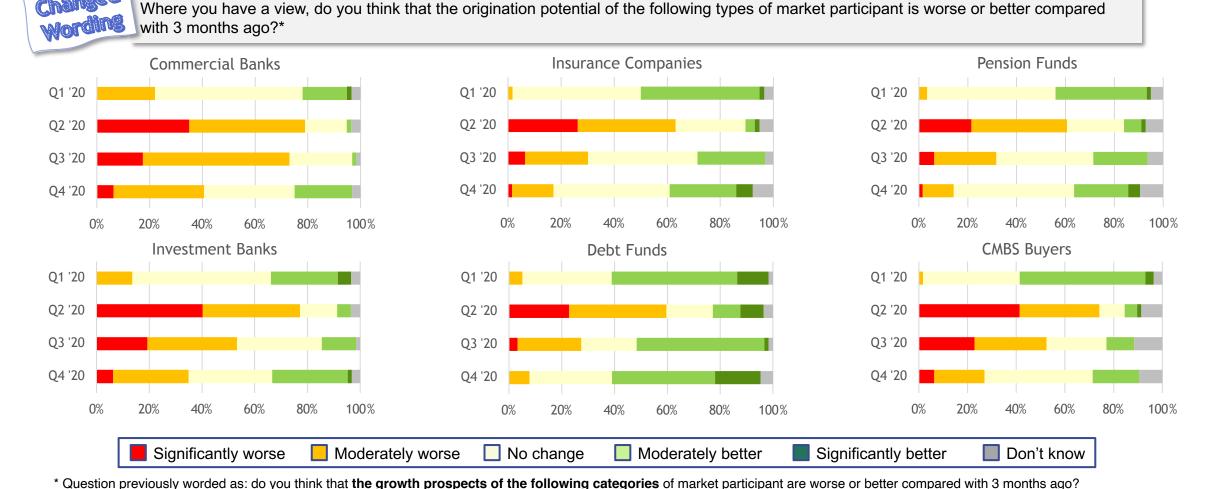

As this is a new question, at this stage there is no trend. However, it is surprising that 1 in 4 respondents perceive risk adjusted returns for real estate debt to be worse than extremely low yielding coupons like sovereign debt and BBB corporate bonds (assets that are not without risk in the current crisis). At the other end of the risk spectrum, more than 1 in 3 see direct real estate as more attractive.

Debt funds are expected to be better positioned to capitalise on origination potential, whereas banks – both commercial and investment banks – are seen as less well placed.

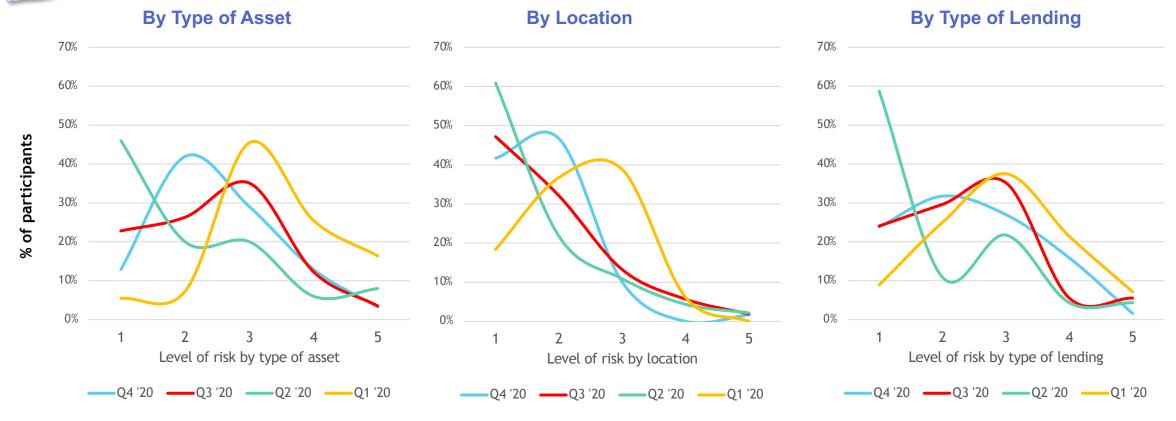

Question 8

On average respondents see most attractive opportunities in Q4 at lower risk levels than in Q3. As with previous quarters, opportunities appear to be more attractive at slightly lower risk levels by location than by type of asset or type of lending.

Questions 9-11
Where do you see the most attractive opportunities over the next 3 months, on a scale of 1 to 5, where 1 = low risk and 5 = high risk?*

^{*} Question previously worded as: Where do you see the most attractive risk-adjusted returns over the next 3 months, on a scale of 1 to 5, where 1=low risk and 5= high risk?

A few selected comments about the market and the Covid impact suggest an overweight towards negative to neutral sentiment. A few positive views are heavily caveated.
