LEEDS EVENT 11TH JUNE

***The Key to Success when
Implementing a Data
Catalogue with Robert
Waterhouse.***

11TH JUNE 2025

slalom

The Key to a Successful Data Catalog implementation

Key Outcomes of this Session

1. What is a Data Catalog?
2. Why do you need it as part of your AI ambition?
3. What happens if you don't get the implementation right?
4. What is the right approach when implementing a data catalog?
5. What are the High Level Benefits of a Catalog?
6. What does a typical Roadmap look like?

The world is changing

AI is reshaping industries and the role that Data now plays is a priority

Organisations are now ***harnessing the power of technology and data analytics***, alongside the ***upskilling of their people*** to ensure continued differentiation of their products and services.

To thrive in this new era of data and AI, organisations must ***capture, manage and consume data*** in line with regulation whilst leveraging maximum value

Slalom exists to create value at the intersection of ***business, technology***, and ***humanity*** for this new era of Data

**Slalom exists to create value at the intersection of
*Humanity, Technology and Business.***

“Your Data Catalog, the **Data Search Engine** and **Shopping App**, making it easy to find, understand, collaborate, trust, and **unlock value from your data**”

Rob Waterhouse

Senior Principal Consultant, Slalom

What is a Data Catalog?

A central tool that captures, removes technical jargon for easy understandable naming, descriptions and an easy way to add tags, classify, define owners and see data lineage.

- **Technical Metadata:** Classifies data by type, format, privacy tags, and keys
- **Business Metadata:** Arms the business with easy to understand terms, definitions, and usage rules
- **Data Lineage:** Tracks the origin and flow of data, aiding in impact analysis and error tracing
- **Search & Discovery:** Enables users to filter and locate relevant data quickly
- **Collaboration Features:** Allows users to comment, upvote, and curate datasets to improve adoption and trust
- **Bring Standards to life:** Rather than document actually apply proactive standards to data

2) Taxonomy to drill into different data categories

Product description

Getting back was only the beginning as the most spectacular time-travel adventure ever continues in Back to the Future Part II - the sequel that proves that lightning can strike twice! Picking up precisely where they left off, Marty and Doc (Michael J. Fox and Christopher Lloyd) launch themselves to the year 2015 to fine-tune the future and inadvertently disrupt the space time continuum. Now, their only chance to fix the present is by going back to 1955 all over again before it is too late. From the Academy Award-winning filmmakers Steven Spielberg and Robert Zemeckis, Back to the Future Part II proves true excitement is timeless.
