

[Patient Easy Read Cervical Screening Survey]

STATISTICS & ANALYSIS

The following data has been gathered from patients with learning disabilities and or autism's responses to our easy read cervical screening survey that was sent to all 38 Wandsworth GP Federation surgeries/PCNs for them to identify eligible patients and distribute/collect the questionnaires.

QUESTION 1

Did you get the invite in a format you understand

ANALYSIS & FINDINGS:

20% of respondents received their cervical screening appointment in a format they understood, whilst 80% didn't.

Hence, most patients did not get their invitation in an accessible format they understand.

QUESTION 2

Was the invite easy to understand?

ANALYSIS & FINDINGS:

Despite 20% of respondents reporting getting the invitation in an accessible format, 20% then stated that the content wasn't easy to understand, whilst 60% found the invitation easy to understand.

20% answered not applicable.

QUESTION 3

What format was it in?

ANALYSIS & FINDINGS

40% of respondents received an easy read letter inviting them for cervical screening, 20% got an easy read and a phone call, whilst 20% were invited verbally, with the other 20% answered not applicable.

QUESTION 4

Did you book the appointment or did someone help you?

ANALYSIS & FINDINGS

60% of respondents booked their appointments themselves, whilst 20% received help and the other 20% required assistance, but did not get any.

QUESTION 5

Did anyone explain what the appointment was for?

ANALYSIS & FINDINGS

All respondents said someone explained to them what the cervical screening appointment was for.

QUESTION 6

Did they explain what happens during the test?

ANALYSIS & FINDINGS

Despite all respondents being informed what the appointment was for, 60% said no one explained to them what would happen during the test.

However, 40% did have the test process explained to them.

QUESTION 7

Who gave you the information?

ANALYSIS & FINDINGS

Nurses communicated cervical screening appointment information to 60% of the respondents, whilst the remaining 40% received the information from their GP and a nurse.

QUESTION 8

Were you offered a chaperone?

ANALYSIS & FINDINGS

During the cervical screening appointment, 60% of patients, with a learning disability, were offered a chaperone, whilst 40% weren't.
