Registered Health Professionals and Students Welcome

In §71-80 of the Organon, Hahnemann gives instructions as to the classification of the chronic diseases, describing the ways in which the vital dynamis is disturbed. In this 3-part series Ewald will continue the themes of disease classification, and how we might approach case analysis and treatment according to Hahnemann's own methodology.

We will develop our understanding of how to apply repertorisation and the use of the Q potencies (LM's), nosodes and intercurrent remedies.
