

Request to attend PCPA Midlands Symposium

I would like to request approval to attend the PCPA Midlands Symposium on 20th May 2026 in Birmingham.

This event is specifically designed for pharmacists working in primary care, including general practice and PCN roles, and focuses on practical, clinically relevant learning.

The programme includes sessions on:

- Diabetes, cardiovascular and respiratory care in primary care
- Demonstrating value within GP practices and PCNs
- How General Practice is using Artificial Intelligence

Attendance will support my continuing professional development and help me to:

- Improve patient care within our practice
- Manage complex patients more effectively
- Work more efficiently in a time-pressured environment
- Strengthen my contribution to the practice and PCN

This learning will be directly applicable to my current role and will support service delivery and patient outcomes.

A certificate of attendance can be provided.
