

Digital Distance Learning Programme

Regional | Open-access | Curriculum-mapped

A. Satar and R. Berg, K. Birley, N. Prince, J. Runnacles
London School of Paediatrics Trainees' Committee

Our challenges

- Cancellation of all face-to-face training, including regional and local hospital training in our region.

However, children still need paediatricians and paediatricians still need training...

How could we adapt?

Our solutions

1. A structured curriculum-mapped online learning programme

- Open-access
- Mixture of general paediatric, neonatal and subspecialty themes
- When possible, sessions were recorded and available on YouTube

2. Learning Packs

- Individual or small group activities with themes complementing the learning programme
- Open-access

Regional Training Going Global

- **94** uploaded videos have been collectively viewed **26,232** times by viewers worldwide.

Our Results - Live Participation

- Between March and September 2020, **161** sessions were delivered to a total of **10,895** attendees.
- Attendance ranged from **12-250 (median 57)**.
- Sessions were led by experts from the NHS and beyond:

Image 2: Sessions delivered by professionals

- **552** responses to the feedback survey rated sessions **4.7/5** overall for educational value.
- Free text feedback praised the accessibility of the teaching:

- **Brilliant, please continue these online sessions even when this pandemic is over**
- **Enjoying the online teaching a lot! I hope it continues after COVID**
- **Virtual teaching is brilliant idea which increases accessibility for the trainees**
- **Keep up these talks please! Much easier to attend and learn particularly as lots of local teaching gets cancelled!**

The Future

- Our free, open-access digital regional learning programme is a popular resource amongst trainees.
- Bridging digital learning with local workplace training enables continued achievement of competencies and training progression whilst responding to pandemic-related service escalation and changes.
- As paediatric training continues in the era of Covid-19 and beyond, the LSP will maintain our online training programme in addition to face-to face regional training.
