Aura delivers AV Innovation in Education

Aura is one of the leading workspace and technology providers in the education space, delivering projects that create impact for students, teachers and educators that matter.

Auras' end-to-end service takes a holistic view of your establishment, assets, people, and objectives, creating the most effective, efficient, and objective-supporting workspace solutions.

We offer continued support through the delivery process, work with you through design and implementation, and then offer a range of support and maintenance options to ensure your systems don't just work perfectly for your business when they're first adopted but will continue to do so optimally throughout their lifecycle.

Flexible Learning Spaces

Transforming traditional learning spaces into collaborative environments.

Integration Expertise

Making technology intuitive for users and connecting seamlessly with IT infrastructure.

Support & Managed Services

Dedicated service desk, managed portal and maintenance packages to ensure ease and reliability.

Industry Leading Accreditations

Over 150 workspace technology experts with offices around the world designing, installing and maintaining solutions.

Supporting Our Customers

> **From beginning to end it has been a pleasure to work with Aura. Brilliant coordination, communication and attention to detail along with a diligent and can-do attitude from his onsite team, meant the installation and commissioning went very smoothly.**
>
> AV Infrastructure and Development Manager, City, University of London

> **The Aura design team have fully understood the customers user case, and advanced on the Microsoft Teams Room architypes to ensure the solution fits the customers requirements. Huge congratulations Aura, this is a fantastic design to fit our customers needs.**
>
> Nicky Chapman, UK DPS Lead, Microsoft Teams Rooms & Devices

Aura Managed Service Portal (AMP)

Live project details - historical data and ticketing

Real-time insights - at organisational and individual level

Bespoke mobile and web portal - integrated with legacy systems

> " The new facilities allowed us to seamlessly transfer to online teaching in many subject areas. Indeed, we have been able to advance our educational strategy by several years in a matter of months, as we can now provide teaching in 4K around the globe. "
>
> Director, UCL

> " This was an extremely satisfying and very well-delivered project. Exemplary collaboration between everyone involved. The vision, technical knowledge and flexibility were truly commendable. "
>
> Estates Operations Manager,
> Imperial College London
