

Tony Robertson Bio

I am a lecturer in Geographies of Health, based in [Biological and Environmental Sciences at the University of Stirling in Scotland \[stir.ac.uk\]](#). My research and teaching interests are focused on linking understandings of the complex and challenging inter-relationships between humans and biological and environmental systems. I am particularly interested in socioeconomic inequalities and the impacts these inequalities have on people's underlying physiology and health and how we address these inequalities.

I studied Behavioural Ecology at degree and PhD level before changing my focus to human health and Social Epidemiology/Public Health in 2010 when I joined [the MRC/CSO Social and Public Health Sciences Unit, University of Glasgow \[gla.ac.uk\]](#) on a Career Development Fellowship. In 2013 I moved to the [Scottish Collaboration for Public Health Research & Policy \(SCPHRP\), University of Edinburgh \[twitter.com\]](#), as the Research Fellow and Lead for the Working Age/Adult Life Working Group. In January 2016, I moved to become Lecturer in Social Epidemiology and Public Health in the [Faculty of Health Sciences & Sport, University of Stirling \[stir.ac.uk\]](#) and then moved to Biological and Environmental Sciences in May 2021.

I became Executive Editor for the Longitudinal and Life Course Studies (LLCS) journal in August 2023, having previously served as an ordinary committee member and honorary Treasurer for the Society for Longitudinal and Lifecourse Studies (SLLS).
