FEEDBACK

You can give feedback at any time during the conference. The location of the feedback forms is at the registration desk in the foyer of LTB. After the conference you will receive an electronic feedback form from Cat Westlake.

CERTIFICATE OF ATTENDANCE

If you would like a certificate, please ask / email Cat Westlake (cwestlake@slls.org.uk) and she will prepare one for you.

EMERGENCY PROCEDURES

General First Aid is provided on Campus by appropriately trained members of the security team. They can be contacted by dialling 01206 872 125.

In the event of sudden illness or collapse please call 01206 872 222 and state your name, your location and the nature of the incident. Security will contact the appropriate service and give them the full details including your location. You should not dial 999 direct, as this can potentially delay the arrival of the emergency service. Security will also send a First Aider to the location to either administer first aid or provide support whilst waiting for the arrival of the emergency services.

MINOR AILMENTS & ADVICE

For telephone advice regarding minor ailments, the NHS helpline can be contacted on 111. Alternatively, you can visit the Colchester NHS Walk-In Centre located at the Colchester Primary Healthcare Centre, Turner Road, for advice and treatment of infections, rashes, stomach upsets or injuries such as cuts, strains, sprains, fractures and burns. The Walk-In Centre is open from 07:00 – 22:00 every day.

In an emergency, please contact Security on the emergency number 01206 872 222.

FIRE REGULATIONS

There is no fire exercise planned, so if the alarm goes off it is real.

If the fire alarms sound, without delay, leave the building, following the green and white signage and make your way to the nearest final exit, do not use the lifts. Please close doors behind you and assist anyone having difficulty. Congregate outside, well away from the building. All fire exits and escape routes are clearly marked. Nobody is to re-enter the building until instructed it is safe to do so. The alarm often stops sounding before it is safe. If you believe or see there is a fire and the alarms are not already sounding, please make your way to the nearest exit and activate a manual call point on the way out.

President's Welcome

It is my great pleasure to welcome all of you, from across the globe, to the 2024 Society for Longitudinal and Lifecourse Studies Conference being held this year at the University of Essex in Colchester, England. This year's theme is *Inequalities Across Life Courses and Generations: Interdisciplinary Perspectives*. We have a full programme of excellent keynote talks, concurrent sessions and interactive opportunities that will provide the chance for delegates to explore the wealth of new knowledge that can be generated by bringing together experts across traditional disciplinary siloes to enable a better understanding of what contributes to health and wellbeing outcomes across the lifecourse and across generations. The programme this year highlights the inequalities that are experienced within and across populations in terms of differential opportunities for optimal development within the broader societal contexts in which they live. Inequalities have persisted across time and generations and understanding how to reduce their causes as well as mitigate their impacts and their societal and economic costs is at the core of much of the life course and longitudinal research that we collectively undertake.

During this conference we have the chance to celebrate the efforts of researchers and teams who continue to collect information about the complex lived realities of everyday individuals and families. These curated collections that detail the progress of ordinary life courses provide a rich and powerful resource to explore how we might improve wellbeing for our own populations with context relevant and timely interventions that are evidence based. We are particularly grateful that this year the conference is being hosted at the University of Essex where "Understanding Society" is based. Understanding Society is a remarkable household longitudinal study that provides a unique set of information about families and households across the UK and is used widely by researchers and policy makers to generate evidence relevant to addressing inequalities over time and across generations. We are also extremely grateful to our sponsors – Wellcome, the UK Longitudinal Linkage Collaboration and the UCL Centre for Longitudinal Studies – for supporting this meeting and more generally for their support of longitudinal and lifecourse research.

It is exciting to see we are increasingly finding ways to come together as a community of practitioners working in life course and longitudinal research to explore innovative ways to collect information from participants while minimizing participant burden, as well as adapting and harnessing innovative new methodologies to interrogate the information in a way that is respectful of the complexity of the inter-relationships between data points across time and place, and respectful of the individuals it relates to. At this conference we will consider how we can support each other as a community of researchers, and also how we might combine our efforts to gain a more nuanced understanding of what works to improve lives and support populations to flourish across different temporal and socio-political contexts.

I would like to express my particular gratitude to Meena Kumari and her team at the University of Essex for their commitment to facilitating and hosting this conference. It is such a privilege to be able to gather in person to enjoy formal sessions and informal opportunities to network with our global peers as well as to build new relationships that will ensure this field of research is sustained for future generations of scholars and for the benefit of the diverse populations we serve. My huge thanks also go to Cat Westlake who keeps everything running smoothly for the society. Her efforts are enormous and usually unseen.

This conference honours the legacy of some of our inspirational leaders who have been pioneers in the field of life course and longitudinal studies over many decades. We stand on their shoulders as we look to the future of the society that you are all invited to participate in. I look forward to welcoming you to these sessions and opportunities and I hope you leave this conference with a renewed energy to undertake research that can make a difference to everyday lives and help to close the gap between those in our populations who easily thrive and those who are being left behind.

Professor Susan Morton (President, SLLS)

Welcome From Your Hosts

We are delighted to welcome you to the Annual meeting of the Society for Longitudinal and Lifecourse Studies (SLLS) conference 2024 at the beautiful Colchester campus of the University of Essex.

This year's theme *Inequalities Across Life Courses and Generations: Interdisciplinary Perspectives*, was chosen to highlight the strengths in the SLLS community and the overlapping research focus in the Institute for Social and Economic Research (ISER). Inequalities have persisted across time and

generations and the use of interdisciplinary approaches to understand how to reduce their causes as well as mitigate their impacts and their societal and economic costs is at the core of much of the life course and longitudinal research that we collectively undertake.

ISER is a leading, prize-winning social science research institute bringing together researchers from diverse fields and backgrounds for over 30 years and encouraging interdisciplinary collaborative research. We host the ESRC Centre for Microsocial change (MiSoc), a longstanding Centre focused on inequalities research, which has led a variety of projects on how individuals and families respond to change. Building on its success with the EUROMOD, ISER has recently established the Centre for Microsimulation and Policy Analysis (CeMPA), that uses microsimulation modelling techniques and tax & benefit systems to understand family & gender, health & wellbeing, population change & labour market dynamics. Of particular interest to SLLS, we are involved in the generation, development, and maintenance of social surveys: we house *Understanding Society*, Survey Futures and contribute to the European Social Survey. *Understanding Society*, one of the largest household panel surveys in the world, started in 2009, and builds on and incorporates the long running British Household Panel Survey (1991-2008) also housed at ISER. By following individuals every year across their life course, the study has enabled research into changes in the lives of UK residents over the last three decades. The study promotes research across disciplinary divides by combining rich biomarker and social data, some of which will be evident at the conference this year.

The University of Essex is a powerhouse for social science research and is in the top ten in the UK for economics and sociology. The University has recently established the Institute for Public Health and Wellbeing to harness this expertise and work across disciplines with science and health, the arts and humanities to address the root causes of health inequalities. Further, the University hosts the UK Data Archive, home to the largest collection of UK datasets, many of which have featured in presentations at past and the current conference.

The conference will be held on our beautiful campus in Colchester. Although our University only goes back 60 years, you can be part of ancient history here too - our campus parkland was originally a deer park, with oak trees that go back to medieval times and a parkland that was painted by John Constable in the early 1800s. Colchester is Britain's oldest recorded settlement, founded by the Romans over two thousand years ago. Our city has a rich and varied heritage, with Roman, Saxon, and Norman history all still visible in the city centre and street layout. A short stroll around Colchester will introduce you to Roman walls, medieval priory ruins, the quaint Dutch quarter and our Norman castle. Nearer our campus is the pretty village of Wivenhoe, where there are scenic walks along the quayside, a well-stocked village bookshop (and several excellent pubs).

Thus, SLLS will be hosted in an inspiring and welcoming academic environment with an exciting programme comprising four keynote lectures, two invited talks, three panel sessions, 52 symposia and paper sessions organized in six parallel strands, six SLLS group meetings (delegates encouraged to attend), and a poster session, complemented with three pre-conference workshops.

The programme provides new findings on a broad range of topics, information on available data sets for scientific use and introduces new methods in data analysis. There will be opportunities for networking during the welcome reception, coffee breaks, and the conference dinner, including an evening out for early career delegates.

SLLS is truly interdisciplinary, and so is its 2024 conference – not only regarding its participants and contributions, but also with respect to the organizing team with our diverse background in Epidemiology, Sociology, Economics and Demography. We are grateful for the financial support of Wellcome, the UK Longitudinal Linkage Collaboration (UK LLC), and the UCL Centre for Longitudinal Studies (CLS).

We hope you enjoy the conference!

Meena Kumari and Alita Nandi - on behalf of the local organizing team:
Jay James, Becky Parsons, Emily Grundy, Cara Booker, Edith Aguirre, Daria Popova, Paulo Serodio, Silvia Avram, and Laura Fumagalli.

With Many Thanks to the Conference Sponsors

Wellcome is a global charitable foundation established in 1936. Through our work we support science to solve the urgent health issues facing everyone. We fund curiosity-driven research, and we're taking on three of the biggest health challenges facing humanity – climate change, infectious disease and mental health.

With a £36.8 billion investment portfolio, we give researchers the time and resources they need to make breakthroughs. We also work with policy makers, run advocacy campaigns, and form partnerships with other organisations to ensure everyone, everywhere benefits from advances in health science.

www.wellcome.org

Funded as part of the COVID-19 Longitudinal Health and Wellbeing National Core Study the UK Longitudinal Linkage Collaboration (UK LLC) is an innovative project developing a new approach for linking well-established longitudinal studies to routine records.

The data is held in a Trusted Research Environment, established by SeRP UK, where linked data from the studies taking part can be used in COVID-19 research across the UK.

Our work is driven by the Universities of Bristol and Edinburgh, in collaboration with SeRP UK, Swansea University, University of Leicester and UCL. The National Core Studies Programme is enabling the UK to use health data and research to inform both our near and long-term responses to COVID-19 as well as accelerating progress to establish a world-leading health data infrastructure for the future.

CENTRE FOR LONGITUDINAL STUDIES

The UCL Centre for Longitudinal Studies is home to a unique series of UK national cohort studies. Our studies follow multiple generations of people across the whole of their lives. The majority of our studies are birth cohort studies that started at birth, or in the first year of life. Two of our studies (Next Steps and COSMO) began during adolescence. All our studies are nationally representative.

By collecting information from the same people over time, we build powerful resources for research and policy development. For more than 60 years, evidence from our studies has helped to inform and shape the world we live in today.

We are part of the UCL Social Research Institute based at the IOE, UCL's Faculty of Education and Society. We are funded by the Economic and Social Research Council, and receive co-funding from a number of different funding bodies.

SLLS MEETINGS

These informal meetings are open to all delegates. No prior registration is required, so please feel free to pop along. Please note: LLCS Journal meeting is for Editorial/Advisory Board only.

16:10 – 17:05 **4A NO SESSION**

16:10 – 17:05 **4B LLCS JOURNAL EDITORIAL/ADVISORY BOARD** ROOM: LTB5

Executive Editor: Tony Robertson, University of Stirling

Longitudinal and Life Course Studies (LLCS) is the Society's peer-reviewed journal dedicated to the needs of researchers studying the life course and using longitudinal methods at the interfaces of social, developmental and health sciences. It fosters cross-disciplinary and international endeavours and promotes the creation and exploitation of longitudinal data resources as well as their application to policy issues. Access to the journal is a benefit of SLLS membership.

JOURNAL INFO: <https://www.slls.org.uk/pages/journal>

16:10 – 17:05 **4C SLLS INTERDISCIPLINARY HEALTH RESEARCH GROUP** ROOM: LTB8

Group Co-ordinator: Bram Vanhoutte, Université Libre Bruxelles

The aim of this group is to structure and facilitate health related research across disciplinary boundaries and promote open access datasets.

JOIN MAILING LIST: <https://www.slls.org.uk/pages/interdisciplinary-health-research-group>

16:10 – 17:05 **4D SLLS POLICY GROUP** ROOM: LTB7

Past Group Co-ordinator: Susan Morton, University of Technology Sydney

Life course study and longitudinal research are potentially of central importance to the policy process. The SLLS is well placed to identify the expertise and research resources needed to underpin the relevant evidence base in different policy domains. The Society's executive committee decided to create a database registering members' expertise, relevant experience and policy interest areas. It acts as a source of partners for collaboration on international longitudinal research projects directed at policy issues; help the executive committee to respond to policy debates; and broaden the scope of our international journal, LLCS, in policy research directions.

JOIN MAILING LIST: <https://www.slls.org.uk/pages/policy-group>

16:10 – 17:05 **4E SLLS COHORT NETWORK** ROOM: LTB3

Group Co-ordinator: Lisa Calderwood, University College London

This network is a forum for people working in and on longitudinal studies. It brings together researchers across the behavioural, developmental, and health and statistical sciences, and the professional data, survey and communications managers who are also an important part of the interdisciplinary teams who create and run these studies. The Network's key objectives are the maintenance and continuation of existing studies and the facilitation of the development of new ones at local or national level.

16:10 – 17:05 **4F SLLS REFUGEES ACROSS THE LIFE COURSE GROUP** ROOM: LTB9

Group Co-ordinator: Ben Edwards, Australian National University

This group is a forum for pursuing cross-national comparisons (and harmonisation of data) for pure research and policy evaluation facilitating best practice in the conduct of life course and longitudinal studies of refugee populations.

COORDINATE Event (post-conference)

Child and Youth Wellbeing: Longitudinal Evidence for Research and Policy

This event will include research evidence from longitudinal studies and policy perspectives on child and youth well-being.

Host: Policy Evaluation & Research Unit (PERU), Manchester Metropolitan University

Date: Friday 27th September 2024

Time: 09:00 - 13:00 (BST)

Location: Stem Building, University of Essex (Colchester Campus)

Host website: <https://mmuperu.co.uk/>

AGENDA

09:00 - 09:30: Registration

09:30 - 12:30: Presentations

12:30 - 01:00 (+1 day): Networking Lunch

ABOUT THIS EVENT

This event brings together key scientists and policy makers to highlight examples of how longitudinal survey data has contributed to a better understanding of children and young people lives in different countries and the ways in which social policy interventions benefit from investments in survey data infrastructure.

High quality longitudinal data on child development and wellbeing is routinely used to answer scientific and policy questions wherever such data is collected. Its importance in understanding national contexts and in developing national interventions to meet challenges related to inequalities of education, health and poverty is widely accepted.

In many countries, however, there is a critical gap in their data infrastructure on child development and wellbeing as they do not yet collect longitudinal data on children hence there are significant gaps which suggest that much policy related expenditure on child wellbeing is not supported by robust evidence. The Growing Up in Digital Europe (GUIDE) research Infrastructure is seeking to address this significant data gap at the same time as making it more possible to undertake comparative analysis through the collection of harmonised longitudinal data across Europe.

This event, organised by the GUIDE study team, will include research evidence from longitudinal studies and policy perspectives on child and youth well-being, as well as giving an overview of the Growing Up in Digital Europe study.

This is a free in person event, but registration is necessary here: <https://www.eventbrite.co.uk/e/child-and-youth-wellbeing-longitudinal-evidence-for-research-and-policy-tickets-903292982627>
