Message from the President

On behalf of the *Society for Longitudinal and Life Course Studies* (SLLS) and as President of the SLLS, I would like to extend a warm welcome to all participants here in Bamberg.

Our conference is hosted by the *Leibniz Institute for Educational Trajectories* (LifBi) in co-operation with the *University of Bamberg*. The LifBi is the home of one of the biggest longitudinal studies worldwide: The *German National Educational Panel Study* (NEPS). Cat Westlake in London and Julia Göpel, Kathrin Erbacher, Hans-Günther Roßbach, Jutta von Maurice and the local organizing team in Bamberg, as well as myself, have done everything to make this conference an enjoyable event and an important and productive scientific meeting. Judging from the high number of submitted paper abstracts and symposia received from life course researchers worldwide, and the vast scope of topics submitted from well-known experts and young talented researchers, we are proud to be able to present a truly interdisciplinary and international conference programme.

Our conference programme covers the full spectrum of important themes of longitudinal and life course research: physical, psychological, social developmental and ageing processes and functioning within and across life course stages, from infancy to old age; methods and findings of cohort studies; other sources of longitudinal data, such as panel studies and record linkage; international comparisons; household, and income dynamics; intergenerational transfers and returns to learning; gene-environment interactions; ‘mixed’, and comparative methods; innovative methodology in design, measurement, data management, analysis and research practice (quantitative and qualitative). Attractive highlights of the programme are the three keynote presentations by Jeylan Mortimer (University of Minnesota, USA), Sabine Weinert (University of Bamberg, Germany), and myself (European University Institute, Italy). Given the high participation rate in this conference, you can expect lots of opportunities to meet interesting colleagues and to have exciting scientific exchanges. Thus, this will be an attractive scientific opportunity for all of us.

Please don't forget to enjoy the city of Bamberg. Endowed with one of Europe's largest intact old town centres, Bamberg became a UNESCO World Heritage Site in 1993. In the 12th Century, Bamberg experienced its period of greatest prosperity. The medieval layout of the city with its three settlement areas, is still well preserved. In the late 18th Century Bamberg was the centre of the Enlightenment in southern Germany, with eminent philosophers and writers such as Georg Wilhelm Friedrich Hegel and E.T.A. Hoffmann living there. As you will experience yourself, Bamberg has a distinct romantic flair with narrow alleys, cozy corners, medieval and baroque building fronts. Thus, the old town of Bamberg is itself a unique work of art. Today, Bamberg is also a lively arts and cultural centre, with a long tradition of beer brewing and wonderful beer gardens on top of Bamberg's hills, and the buzzing atmosphere of a city full of life and street cafés and small antiques shops. If you like, you can enjoy a sightseeing tour offered by the local conference organizers.

I'm looking forward to an excellent conference with stimulating scientific exchanges and interesting interdisciplinary discussions in a wonderful historic town setting.

Hans-Peter Blossfeld

Cohort & Longitudinal Studies
Enhancement Resources

The UK is home to the world's largest and longest-running longitudinal studies. CLOSER aims to maximise their use, value and impact both at home and abroad. Bringing together eight leading studies, the British Library and the UK Data Service, CLOSER works to stimulate interdisciplinary research, develop shared resources, provide training, and share expertise. In this way CLOSER is helping to build the body of knowledge on how life in the UK is changing – both across generations and in comparison to the rest of the world.
