Future of the Society and Bulletin

No doubt our future development will be discussed at the A.G.M. The general purpose of the Society is, of course, to achieve "a systematic link between the Co-operative Movement and the universities and colleges for the exchange of information and experience on Co-operative studies and research". The central question is extending in universities and colleges the range of interest with which we are linked and making the link more productive.

More particular to my interests, of course, is the service of the Bulletin to that purpose. Over the year within the modest pattern of the Bulletins, each of about 64 pages, (present company excepting!) we have extended the range of authors, of general Co-operative scope which goes far beyond the consumer movement and of Special Features which have covered: The Consumer Movement?; A Sectoral Co-operative Confederation?; Government and Co-operation; The Co-operative Development Agency; and Member Participation in Retail Societies. We have added the Newsletter by Rita Rhodes and the Reviews by Stephen Drodge. So - "where to, what next?". We look forward to the discussions at the A.G.M.

The Next Bulletin

We need, of course, to proceed with Bulletin 43 before the democratic rendezvous with destiny at the September A.G.M. We plan to include a Special Feature on the buying and selling practices of consumer societies which are, of course, central to their performance and market share.
